Company : MTU SERVICES MALAYSIA SDN BHD  
Dept : WORKSHOP  
Name : MR. MOHD SALLEH MOHD YUSOF  
Fax No. : CODE  
Subject : **INSTALLATION OF DEBUG FUEL TREATMENT SYSTEM IN MTU DIESEL ENGINES**

Our Ref.:  
MAL/LPC/PT/7-9-00

Dear Mr. Salleh,

We refer to your fax reference MSM/MSY/1532/2000 dated 5 September 2000 concerning the installation of the Debug Fuel Treatment System in MTU diesel engines. As discussed, both MTU-Friedrichshafen and MTU Asia Pte Ltd have no objections to having the Debug Fuel Treatment System incorporated (off-engine interface) in the fuel supply system of the main diesel engine. However, we wish to highlight the importance of compliance with the limits defined for the system interface that is essential in order to coincide with the limits for engine operation.

Installing the Debug Fuel Treatment System does not invalidate the MTU warranty of the engine. However, please note that warranty does not extend to a failure of any attachment or purchased part attributed to neglect of maintenance, abuse or unreasonable application.

We hope the above information is useful for your reference. Please do not hesitate to contact us should you have any questions. Thank you.

Best regards

Peter Tan
